Re: Philip Morris Public Statements on Smoking and Health

Dear Ray:

Enclosed is a summary document on the public statements on smoking and health by Philip Morris personnel prepared by our office in November 1986. I was not sure if you had seen this document and thought it might be useful. The definition of "public statements on smoking and health" was quite broad and may in fact include some statements that are so tangential to be of no concern in the litigation. However, we have identified these documents as somehow relating to smoking and health.

Best regards.

Sincerely,

RHONDA E. FAWCETT
